DETAILED ACTION

1. Formal Matters

A. Claims 1-19 are pending in this application and were subject to restriction in Paper No. 13. In Paper No. 15, filed 8/13/02, Applicants elected Group II and SEQ ID NO:3. However, upon further consideration, the claims of the present invention were not properly restricted. Therefore, a new restriction requirement has been made. The Examiner apologizes for any inconvenience this may cause.

2. Lack of Unity

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claims 1-7, 11, 12 and 14-16, drawn to an isolated protein encoding a rat sodium channel of SEQ ID NO:2, an encoding polynucleotide (SEQ ID NO:1), vectors, host cells and a method of using said protein.

Group II, claims 8-10, drawn to a recombinant polynucleotide and protein encoding a human sodium channel protein.

Group III, claim 13, drawn to an antibody to a sodium channel protein.

Group IV, claims 17-19, drawn to a sodium channel modulator and a method of using said modulator.

The invention listed as Groups I-IV do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: the special technical feature of Group I is an isolated rat sodium channel. The special technical feature of Group II is an isolated human sodium channel. The special technical feature of Group III is an antibody. The special technical feature of Group IV is a sodium channel modulator. The special technical feature of each group is not the same, or does not correspond to the special technical feature of any other Group. The products of Groups I-IV are structurally and functionally distinct. The Groups are not linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept.
